LAND SUITABLE FOR BOTH CULTIVATION AND GRAZING

1 Land primarily suitable for cultivation under natural rainfall.
2 Land primarily suitable for cultivation with potentially irrigable soils.
3 Land suitable for both cultivation and managed grazing.
4 Land suitable for both cultivation and managed grazing but liable to erosion.
5 Land suitable for both cultivation and managed grazing but liable to serious erosion, strict conservation measures necessary.

LAND SUITABLE FOR GRAZING

6 Land primarily suitable for managed grazing with some potential for improved pastures and cultivation of fodder crops.
7 Land suitable for managed grazing with only limited prospects of pasture improvement.
8 Land suitable for extensive grazing based on natural veld pastures provided there are adequate water supplies.

LAND UNSUITABLE FOR AGRICULTURE

9 Some areas could be used as forest reserves.

PRESENT CULTIVATION

Land under cultivation at the time when the aerial photography was taken.

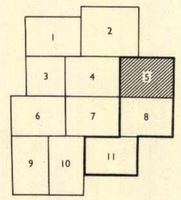
SHEET INDEX



Printed for D.O.S. by the Hydrographer of the Navy
1,000/216/OA/8-63
Ground survey, aerial photographic interpretation and compilation by M.G. Bawden and A.R. Stobbs, 1962.
The base map was prepared by D.O.S. from Bechuanaland 1::125,000 (D.O.S. 547) compiled from air photography taken in 1948, 1950, 1951, 1956 and 1957 and from Print Laydowns compiled from air photography taken in 1948 and 1950, with some corrections to names and tracks 1962.
This map is one of two (each of three sheets) which accompany the report on the Land Resources of Eastern Bechuanaland by M.G. Bawden and A.R. Stobbs of the Directorate of Overseas Surveys.
