MISSION OF THE INSTITUTE FOR ENVIRONMENT AND SUSTAINABILITY

The mission of the Institute of Environment and Sustainability is to provide scientific and technical support to EU strategies for the protection of the environment and sustainable development. Employing an integrated approach to the investigation of air, water and soil contaminants, its goals are sustainable management of water resources, protection and maintenance of drinking waters, good functioning of aquatic ecosystems and good ecological quality of surface waters.

European Digital Archive of Soil Maps

Under the European Digital Archive of Soil Maps (EuDASM) initiated by the MOSES (Monitoring the State of European Soil) of the Soil and Waste Unit (SWU) in the Institute of Environment and Sustainability (IES), located at the Joint Research Centre (JRC), Italy in collaboration with ISRIC – World Data Centre for Soils, Wageningen, The Netherlands, the soil maps of African and Asian continents were already made available online for free access in the European Commission portal of the Soil and Waste Unit (<http://eusoils.jrc.it/>) and also as a digital DVD-ROM version for distribution to all research communities (Selvaradjou et al., 2005^{a, b, c}).

Soil maps of Latin America and Caribbean islands

The second phase of the EuDASM, along with the soil maps of Asia, the soil maps pertaining to the continent of Latin America and Caribbean islands of about 1060 maps are being added to the archive (EuDASM). The list of the maps based on the countries are as follows: South America – continental coverage (67), Argentina (19), Belize (2), Bolivia (11), Brazil (320), British Guiana (31), Chile (34), Colombia (132), Ecuador (104), French Guyana (5), Paraguay (6), Peru (49), Surinam (116), Uruguay (18), Venezuela (18), Mexico (48), Bahamas (2), Central America (4), Costa Rica (13), Cuba (29), Republica Dominicana (5), El Salvador (8), Guadeloupe (3), Guatemala (12), Honduras (6), Jamaica (1), Nicaragua (15), Panama (1), Puerto Rico (1). The metadata of these soil maps are enclosed along with this volume to enhance information potential need for the researcher around the world on the details of the maps: origin (authors), year of publication, publishers, geographical coordinates, map scale and area of potential application of the map. These map information are the related extracts of the ISRIC – World Soil Information Database (<http://library.wur.nl/isric/>) of the concerning soil maps now added to the new mega-archive (EuDASM).

MISSION OF THE JRC

The mission of the JRC is to provide scientific and technical support for the conception, development, implementation and monitoring of EU policies. As a service of the European Commission, the JRC functions as a reference centre of science and technology for the Union. Close to the policy-making process, it serves the common interest of the Member States, while being independent of special interests, whether private or national.

MANDATE OF ISRIC – WORLD SOIL INFORMATION

To increase knowledge of the land, its soils in particular, and to support the sustainable use of land resources. ISRIC is an independent knowledge and research centre, affiliated with the Wageningen University in the Netherlands, and functions as World Data Centre for Soils under the International Council for Science to collect, archive and disseminate data and information on the soils in the world.
