

Soil Atlas of Africa

Results of the user survey for a Soil Atlas of Africa, conducted in May/June 2007

Questions

- Do you use soil information in your work and, if yes, what kind of soil information you use?
- What kind of information you would be looking for in a Soil Atlas of Africa?
- Do you have preference for a Soil Atlas of Africa by country, or as road atlas layout?
- Do you have a preferred scale for the maps?
- What topics or derived maps would you like to see in the Soil Atlas of Africa?
- The Soil Atlas for Africa will be issued in two languages, English and French. Do you wish to see one, bilingual volume, or two volumes in separate languages?
- Are you willing to contribute and, if yes, what is your area of expertise?
- What use would you make of a Soil Atlas of Africa?

Are you willing to contribute and, if yes, what is your area of expertise?

Institute for Environment and Sustainability

What use would you make of a Soil Atlas of Africa?

Conclusions

- Soil maps are to be shown country-wise
- •Two volumes are to be issued, one English and one French
- •The descriptions of the soil types must contain information on attributes/properties and distribution
- •There is a great deal of support and interest for a Soil Atlas of Africa; many respondents indicate their willingness to contribute
- •Supporting information must include degradation/conservation issues, information on critical soil parameters (soil depth, soil texture, water-holding capacity) as well as an overview of the environmental conditions in Africa
