

THE MAP IS COMPILED BY THE SOIL - ECOLOGICAL EXPEDITION OF THE USSR V/O „SELKHOZPROMEXPORT“ 1980

LEGEND
QUALITATIVE GROUPING OF SOILS

Land capability classes	I				II				III					IV					V					VI				VII				
	The best land				Good land				Land of medium quality					Land of satisfactory quality					Land of poor quality					Land of very poor quality				Worst land				
Subclasses	Total	1	2	3	Total	1	2	3	4	Total	1	2	3	4	5	Total	1	2	3	4	5	Total	1	2	3	4	Total	1	2	3		
Bioclimate types																																
Area (thou. ha)																																
A																																
B																																
C	65,2				1,0					36,2	0,1	34,2	0,1		1,8	6,6	0,1	0,2	2,9		3,4	7,8	0,1	0,9	3,4	3,3	0,1	13,5	8,7	4,8		0,1
D																																
Total	65,2				1,0					36,2	0,1	34,2	0,1		1,8	6,6	0,1	0,2	2,9		3,4	7,8	0,1	0,9	3,4	3,3	0,1	13,5	8,7	4,8		0,1

Explanations: A, B, C, D - bioclimate indices
I, II, III, IV, V, VI, VII - class indices; I₁, I₂, II₃, etc. - subclass indices
In horizontal lines A, B, C, D - the area of classes and subclasses within the bioclimate boundaries.
In horizontal line „Total“ - the total area of classes and subclasses within the sheet boundaries.

- TOPOGRAPHIC SYMBOLS**
- Settlements
 - Landmark objects: a - separate constructions, b - ruins
 - Road: Unpaved road
 - Wadi from 10 to 50 m wide
 - Mapping unit boundary of agricultural land
 - Forest range
 - Land excluded from survey (exclusion): a - occupied by industrial enterprises and other special objects, b - occupied by mines and quarries
 - SPECIAL SYMBOLS**
 - Land capability subclass boundary
 - Cultivated land: *The denominator is the percentage of cultivated land in a mapping unit
