

The State Agricultural Experiment Stations and Extension Services, the U. S. Forest Service and other agencies of the Department of Agriculture, and the Washington and field staffs of the Bureau of Agricultural Economics all contributed to the preparation of the map.

MAJOR FARM REORGANIZATION. Areas largely in farms of uneconomic size needing major reorganization of the farm economy to permit conservation farming and provide farm families with higher levels of income.

IRRIGATION ADJUSTMENT. Irrigated lands, many areas of which need adjustments arising from inadequate water supplies and distribution and uneconomic development of irrigation plants.

GRAZING-FARMING REORGANIZATION. Grazing-farming margin in which many of the arable farms need to be reorganized into a system of livestock or combination farming. (Areas in which the problem of reorganization is complicated because of greater extension of crop cultivation are shown by dashed line pattern)

RURAL-URBAN ADJUSTMENT. Areas containing many part-time farms and scattered settlers, poor farms, and cultivated land which needs to be restored to forest and pasture use. Adjustments are concerned with control of land use and occupancy and the integration of farming and forestry.

IMPORTANT OBSTACLES TO LAND USE ADJUSTMENT IN MANY AREAS INCLUDE UNSATISFACTORY SYSTEMS OF OWNERSHIP AND TENURE, UNSTABLE LAND VALUES, OVERSPECIALIZATION IN CROP PRODUCTION, PRODUCTION AT OR BELOW COST, HIGH TAXES, ILL-ADAPTED CREDIT STRUCTURES, LOW LIVING LEVELS, AND TRADITIONAL ATTITUDES TOWARD LAND USE.
