

## Temporary Dataset Download: Global Rainfall Erosivity

ID	124782
Date - Time	Fri, 02/06/2026 - 13:34
Name of User	Oisin Moodliar Walsh
Organization	TU Dublin
Type of Organization	University
-- Other	
E-mail	d24127898@mytudublin.ie
Purpose	I am conducting a project in University, to build a bridge 6m x 0.6m length x width, in a mountainous region of mongolia, i would like to research the erosion potential in the area and the data here would be very helpful. Thank you
Notes	

### Notifications:

1. The data provided has been prepared for use by internal research activities in the Joint Research Centre (JRC) Ispra. The data have been produced in 2013-2017 in collaboration between European Commission (Joint Research Centre), University of Basel and Meteorological and Environmental Institutions from 63 countries all over the World.
2. The data are the result of JRC research activities and are primarily made available for further research. The JRC does not accept any liability whatsoever for any error, missing data or omission in the data, or for any loss or damage arising from its use. The JRC agrees to provide the data free of charge but is not bound to justify the content and values contained in the databases.
3. The input data is the [GloREDA Database](#) (you are recommended to download the 4,000 stations data which includes monthly values as well).
4. The permission to use the data specified above is granted on condition that, under NO CIRCUMSTANCES are these data passed to third parties. They can be used for any purpose, including commercial gain.
5. The user agrees to:
  - make proper reference to the source of the data when disseminating the results to which this agreement relates;
  - Participate in the verification of the data (e.g. by noting and reporting any errors or omissions discovered to the JRC).
