Temporary Dataset Download: 3D Soil Hydraulic Database of Europe at 1 km and 250 m resolution

ID	131842
Date - Time	Fri, 07/31/2026 - 10:56
Name of User	Yu Zhou
Organization	ETH Zurich
Type of Organization	University
-- Other	
E-mail	yu.zhou@usys.ethz.ch
Purpose	This data will be used as a driver in estimating the soil moisture effect on plant productivity. It will be put into a regression model to investigating the temporal change in the controlling effect.
Notes	

Notifications:

1. The data are made available for any activity even commercial.
2. The data provided has been prepared for use partly by the ex - Land Resource Management Unit (Institute for Environment & Sustainability, JRC Ispra).
3. The data were developed for research purposes of the JRC (European Commission). The JRC does not accept any liability whatsoever for any error, missing data or omission in the data, or for any loss or damage arising from its use. The JRC agrees to provide the data free of charge but is not bound to justify the content and values contained in the databases.
4. The permission to use the data specified above is granted on condition that, under NO CIRCUMSTANCES are these data passed to third parties. They can be used for any purpose, including commercial gain.
5. The user agrees to:
    - Make proper reference to the source of the data when disseminating the results to which this agreement relates;
    - Participate in the verification of the data (e.g. by noting and reporting any errors or omissions discovered to the JRC).
