

Temporary Dataset Download: Gully erosion in the EU

ID	131866
Date - Time	Sat, 08/01/2026 - 10:09
Name of User	Wenhao Lyu
Organization	Leibniz Centre for Agricultural Landscape Research (ZALF)
Type of Organization	Research Organization
-- Other	
E-mail	Wenhao.Lyu@zalf.de
Purpose	The dataset will be used in my PhD research at ZALF to investigate the relationship between gully erosion, terrain attributes, remote sensing observations and soil organic carbon across Europe. The data will be used exclusively for academic research and scientific publications.
Notes	

Notifications:

- The data provided has been prepared for use by internal research activities in the Joint Research Centre (JRC) Ispra.
- The data are the result of JRC research activities and are primarily made available for further research. The JRC does not accept any liability whatsoever for any error, missing data or omission in the data, or for any loss or damage arising from its use. The JRC agrees to provide the data free of charge but is not bound to justify the content and values contained in the databases.
- The permission to use the data specified above is granted on condition that, under NO CIRCUMSTANCES are these data passed to third parties. They can be used for any purpose, including commercial gain.
- The user agrees to:
 - a) Make proper reference to the source of the data when disseminating the results to which this agreement relates;
 - b) Participate in the verification of the data (e.g. by noting and reporting any errors or omissions discovered to the JRC).
