Temporary Dataset Download: Global Rainfall Erosivity

ID	136501
Date - Time	Tue, 11/17/2026 - 10:18
Name of User	Kübra Haznedar
Organization	Karadeniz Technical University
Type of Organization	University
-- Other	
E-mail	423907@ogr.ktu.edu.tr
Purpose	PhD research and TÜBİTAK–COST project on the marginalization of highland ecosystems in the Kaçkar Mountains (Turkey). The R-factor will be used in RUSLE soil erosion modelling and InVEST SDR ecosystem service modelling.
Notes	

Notifications:

1. The data provided has been prepared for use by internal research activities in the Joint Research Centre (JRC) Ispra. The data have been produced in 2013-2017 in collaboation between European Commission (Joint Research Centre), University of Basel and Meteorological and Environmental Institutions from 63 countries all over the World.
2. The data are the result of JRC research activities and are primarily made available for further research. The JRC does not accept any liability whatsoever for any error, missing data or omission in the data, or for any loss or damage arising from its use. The JRC agrees to provide the data free of charge but is not bound to justify the content and values contained in the databases.
3. The input data is the GloREDa Database (you are reccomended to download the 4,000 stations data which includes monthly values as well).
4. The permission to use the data specified above is granted on condition that, under NO CIRCUMSTANCES are these data passed to third parties. They can be used for any purpose, including commercial gain.
5. The user agrees to:
    - make proper reference to the source of the data when disseminating the results to which this agreement relates;
    - Participate in the verification of the data (e.g. by noting and reporting any errors or omissions discovered to the JRC).
